

## PRODUCT INFO

# IJB STF (Sublimation-to-Film) System

*Get the Best of DTF and Dye Sublimation in One - Meet STF!*

### OVERVIEW

DTF has rapidly gained popularity in digital imaging, but many have requested a way of combining DTF-type output and sublimation. InkJetBiz (IJB) has the answer with the introduction of its new STF (Sublimation-to-Film) System.

The STF system utilizes dye-sublimation ink to print on film for a process similar to DTF, and also prints on dye-sublimation paper for traditional dye-sublimation output. The results are stunning. This new system is brilliant, as users get two capabilities in one: STF images to virtually all fabrics along with traditional sublimation, including all hard goods. The best part of this system is that only one ink is required for both processes, and it is simple to change dye-sublimation paper to film.

The new IJB STF systems include all the printing components needed to facilitate the sublimation-to-film process. However, you will need a method of applying and curing the powder for the STF process, along with heat presses for sublimation.

### IJB STF SYSTEM COMPONENTS

Here is a list of the components included in GO's STF printing process:

- **Printer:** 44" Mutoh RJ-900X Dye Sub Printer
- **Ink:** GO SubliMate DX Dye Sub Ink (220ml Cartridges)
- **Film:** IJB STF Transfer Film (24" x 66' Roll)
- **Powder:** IJB STF Powder (.5 KG)
- **Software:** GO ColorMate DS RIP (PC or MAC) and GO Pro Create Software
- **Transfer Paper:** IJB SubliMate Dye Sub Paper (44" x 328' Roll)
- **Training, Support and Warranty**

The integration of these components within the IJB STF system showcases the company's commitment to delivering outstanding results with images that exhibit superior performance characteristics compared to other image transfer technologies.

### TARGET MARKETS

STF printing is a versatile printing technique that can be used on a wide variety of products, making it a good fit for a variety of target markets. Not only is STF great for transferring to any fabrics, but hard surface transfers are also available due to its sublimation capabilities. Some of the most common target markets for STF printing include:

- Fashion and Apparel Brands, Promotional Products, Home Decor, Soft Signage and Banners, Ceramics and Mugs, and Sports Equipment

### KEY FEATURES

- Dye Sub to All Fabrics
- Does Both STF and Traditional Dye Sublimation
- Complete Printing System including Printer, RIP, Ink, Film, Powder and Paper
- Wider Color Gamut and More Pop than DTF
- Hard Surface Promotional Items with Standard Sublimation
- Uses Standard DTF Applicator and Curing to Finish Film
- System is One of Most Reliable in Market
- Full Training and Technical Support

### PRODUCT NAME

### LIST PRICE

#### ***IJB STF (Sublimation-to-Film) System***

*Includes 44" Mutoh RJ-900X Printer, IJB STF Inks (220ml - CMYK), IJB STF Film 1 Roll (24"x 66'), IJB STF Powder (.5 KG), IJB SubliMate Dye Sub Paper (1 Roll - 44"x 328'), GO ColorMate RIP Software, GO Create Pro App, Training and Support*
